DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-5, 7-17 and 20-21 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In claims 1-5, 7, 9, 11, 13-17 and 20-21 the Applicant recites the term "type." The "type" affects the scope of the claim a limitation without put forth in definite terms the limitation itself. For example, the limitation styrene type does not read on styrene because styrene is not a type of styrene it is styrene. What does styrene type read on? What about a substituted styrene or any molecule that has styrene as a substituted. By saying "styrene type," the limits of the claim is difficult to garner and can be avoided by removing the term type and/or use specific examples in a Markush limitation. In claims 8, 10 and 12, the Applicant uses the phrase, "main component." The phrase, "main component" has

multiple interpretations. First, a component with more than a 50% presence. Second, the larger component of three or more other component, not necessarily the majority component (greater than 50%).

3. Claims 6 and 18-19 are objected to for depending on a rejected base claim.
